

Teaching Evaluations - Adjunct Faculty, Seattle University

ECON 2110: Principles of Microeconomics | Winter 2026 | Albers School of Business and Economics

Evaluation overview

Evaluation item	Jason Jung	School Avg.	Dept. Avg.
Accessible outside classroom	4.78	4.66	4.56
Respect / courtesy	4.67	4.72	4.62
Recommend instructor	4.44	4.48	4.52
I learned a lot	4.38	4.42	4.39
Encouraged participation	4.33	4.66	4.50
Explained concepts clearly	4.22	4.43	4.39

Notes: Ratings use Seattle University's 1-5 scale. Jason Jung's ratings are shown alongside the Albers School and department averages reported in the official evaluation. Full item-level results and all written comments are appended below.

Recurring strengths in student feedback

- Accessibility and support: the highest instructor-specific rating was accessibility outside the classroom (4.78/5).
- Respect and approachability: students rated respect/courtesy at 4.67/5 and described the instructor as approachable and patient.
- Clear, concise teaching: written feedback emphasized concise explanations, structured lectures, and guidance about what to focus on.
- Practice-oriented preparation: students highlighted practice exercises and reported feeling well prepared for exams.

Selected student comments (verbatim, unabridged)

Winter 2026 — Overall course comments

"Loved the class, interaction was good. Very easy, no high stress and was well prepared for exams."

"Great course. Very well structured and easily to follow through."

"An amazing class and favorite professor! Thank you so much for your support this quarter!"

Winter 2026 — Greatest strengths

"Jason can explain concepts concisely."

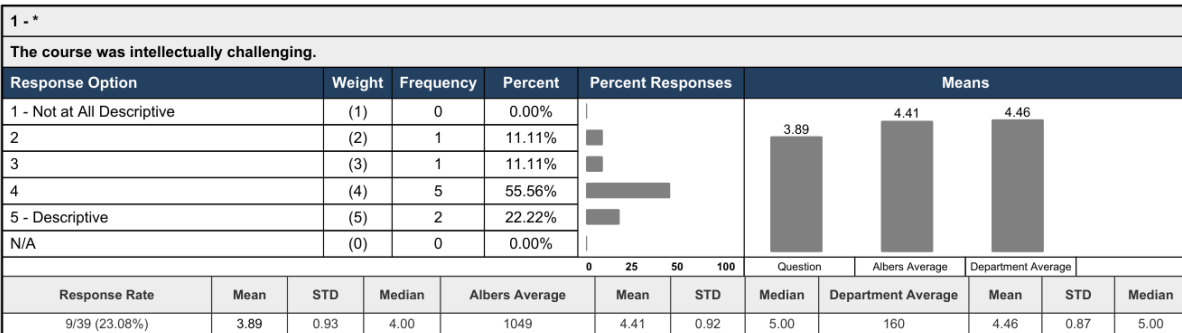

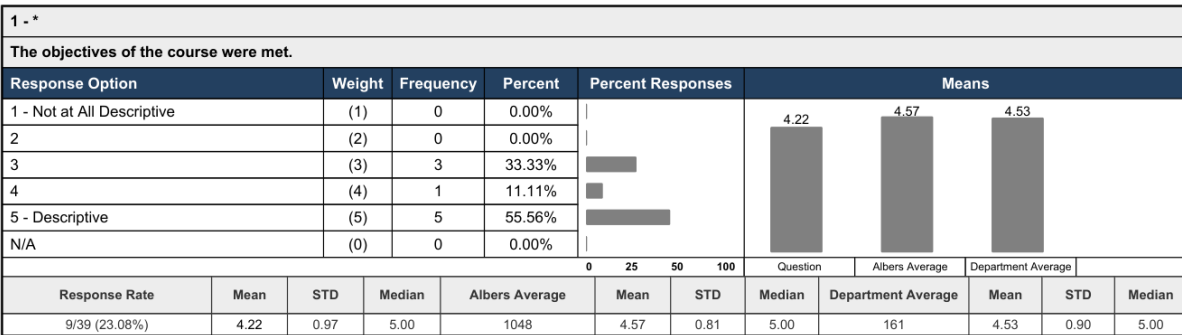

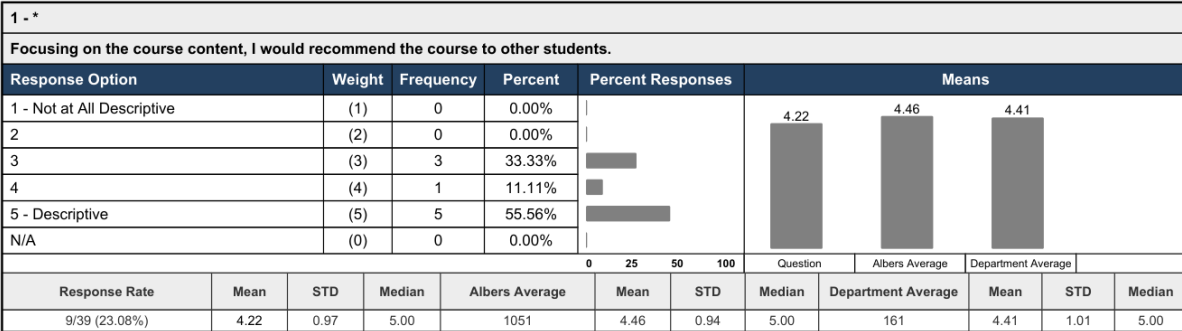

"He wanted his students to succeed and understood that not everyone was taking the class for their major. He pointed out subjects that people should focus on, and was efficient with his lectures. He was patient when answering questions, and gave a good amount of practice exercises in class."

"Very approachable"

3 - Comment on the overall content in the course.

Response Rate 6/39 (15.38%)

- Loved the class, interaction was good. Very easy, no high stress and was well prepared for exams.
- Pretty easy class, not bad tho, I like him as a prof
- Great course, okay teacher
- Great course. Very well structured and easily to follow through.
- An amazing class and favorite professor! Thank you so much for your support this quarter!
- the overall content of the course was pretty difficult for me but this was a fast paced course so I understand why. overall it was very interesting

4 - What were Jason Jung's greatest strengths? -

Response Rate 8/39 (20.51%)

- Material structures
- I liked his explanations in class
- Flexibility
- Jason can explain concepts concisely.
- He wanted his students to succeed and understood that not everyone was taking the class for their major. He pointed out subjects that people should focus on, and was efficient with his lectures. He was patient when answering questions, and gave a good amount of practice exercises in class.
- Very approachable
- His greatest strengths were that we knew what he was talking about and good at working on answering questions.
- Jason strengths was the ability to teacher and let us know what would be considered difficult to learn or what we need to focus on.

5 - If there was room for improvement, what actions could Jason Jung have taken to improve the course? -

Response Rate 6/39 (15.38%)

- Use more examples to work on, so we can have a stronger grasps of the topics.
- I wouldn't know, I liked the guy
- More Quizzes and/or practice questions quizzes on canvas (simulated to be more like the questions on Exams), hard to know exactly how questions are going to be asked. - Less graph based teaching and more math - graphs get confusing, don't make us draw it, give us a blank graph with gridlines (sometimes they do that on HW and it's so much easier) - Less A, B, C questions. Or give us some multiple choice (1-2). 4 questions turns into like 25 open ended
- The only thing I felt was kind of an improvement was the final covered a lot more content then taught.
- Maybe been a more descriptive and made sure everyone understood what he was explaining and not rushing through the lecture.
- Jason might just need to teacher more classes to gain more confidence as he was very confident but since this was his first course, when student approached him with questions he would take a minute to answer as he didn't know how to address them.
